DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method for preparing a solution, classified in class 510, subclass 108.
 - II. Claims 10-13, drawn to a method for of using the solution, classified in class 438, subclass 689.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in group I and group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions can't be used together since a method of preparing the solution can't be used to etch the silicon. Furthermore, they both have different mode of functions. One is to prepare the solution and the other is to etch the silicon.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1765

5. A telephone call was made to R. Barry Johnson on 3/15/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
